### 35 USC §101 Rejections

The Examiner states:

**Claims 1, 24, 27, 30, 31, 33 and 39 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either an asserted watermarking utility or a well established utility. The Applicant claims no mechanism for detection of input sequence or mechanism for detecting a watermark.**

**Claims 1, 24, 27, 30, 31, 33 and 39 are rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a watermarking utility or a well established utility for the reasons set forth above one skilled in the art clearly would not know how to use the claimed invention.**

Applicants respectfully traverse this rejection.

Claims 1, 24, 27, 30, 31, 33 and 39 have been amended to include recognizer as the mechanism for detection of an input sequence or mechanism for detecting a watermark. Accordingly, Applicant submits that the rejection under 35 U.S.C. 101 has been overcome since the mechanism for detection in an input sequence and/or a mechanism for detecting a watermark is recited. Furthermore, Applicant submits that the claims are now clear and definite and the rejection under 35 U.S.C. 112 has been overcome.

Conclusion

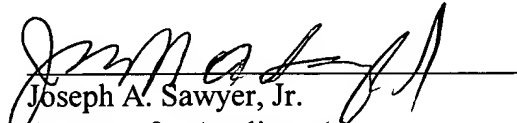

Accordingly, Applicant respectfully requests reconsideration and allowance of claims 1-28 and 30-54 as now presented.

Applicant's attorney believes that this application is in condition for allowance. Should any unresolved issues remain, Examiner is invited to call Applicant's attorney at the telephone number indicated below.

Respectfully submitted,
